November 2018 Newsletter

The holiday season is in full swing and the end of the year is closer than some of us would like for it to be. I still have some New Years resolutions that I need to accomplish! With 31 days left in 2018 I want to challenge all of you to earn one certification before the end of the year! How great would be it to wrap up the year with a new certification? We are so proud of all of our students and the hard work and dedication they are putting into their certification training. In this month's edition we are highlighting cybersecurity and our solution to the growing need of cybersecurity professionals in the workplace. Everyone has been busy and focused. Keep up the great work.

LearnKey Group Study Sessions

We want to make sure everyone has access to our group study sessions. We highly recommend that all of our students attend the sessions that correspond with the certification they are working on. See info below for all available sessions.

Microsoft Monday - Every Monday
11:00 a.m. (MST)
Tutor: Grace Rollins
Please join my meeting from your computer, tablet, or smartphone.
https://global.gotomeeting.com/join/401814461

Tutor Tuesday - Every Tuesday
11:00 a.m. (MST)
Tutor: Tristan Roberts
Please join my meeting from your computer, tablet, or smartphone.
https://global.gotomeeting.com/join/728689101

Tutor Thursday - Every Thursday
3:00 p.m. (MST)
Tutor: Tristan Roberts
Please join my meeting from your computer, tablet, or smartphone.
https://global.gotomeeting.com/join/728689101

Job Readiness - Third Tuesday of Each Month
11:00 a.m. (MST) Thursday at 4:00 p.m. (MST)
Tutor: Tristan Roberts
Please join my meeting from your computer, tablet, or smartphone.
https://global.gotomeeting.com/join/728689101

New Student Orientation - Last Thursday of Each Month
3:00 p.m. (MST)
Tutor: Tristan Roberts
Please join my meeting from your computer, tablet, or smartphone.

Adding to the Cybersecurity Wordforce

In a world where many of the items we use everyday are online and vulnerable to be attacked, a surprising statistic has been revealed. "An estimated 3.5 million cybersecurity job will be available but unfilled by 2021, according to predictions from Cybersecurity Ventures and other experts." As data breaches and attacks become more frequent one thing is clear. There is a need for cyber security professionals.

In an attempt to flood the marketplace with qualified and certified cybersecurity candidates we have partnered with EC Council, the worlds largest cybersecurity technical certification body. Operating in 145 countries globally, they own and developed the world-famous Certified Ethical Hacker (CEH), Computer Hacking Forensics Investigator (CHFI), Certified Security Analyst (ECSA), and License Penetration Testing (Practical) programs. These programs are available to all qualified students.

Cyber Security Update

It makes headlines almost every day. If online fraud or outright theft hasn't become a reality in your life, count yourself as lucky. Cybercrime is now the second most reported crime in the US with attacks happening at a near constant rate of about every 39 seconds (University of Maryland).
How does this impact the "average computer user" on the Internet? Phishing, spoofing, and social engineering are just a few of the many ways hackers steal information, your information, from the trusted places you shop. In 2018, just a few of these businesses included: Best Buy, Delta, Adidas, Macy's, Under Armor, Panera Bread, and many more. You may ask, what to these hackers do with the information they steal? Good question. They literally sell your banking information to whomever chooses to buy it on the dark web.
Yes, the cyber criminals have an amazing set of weapons at their disposal. What we truly need, is someone to step up, someone to become a cyber-hero. That someone could be you!
LearnKey offers cutting edge courses which are designed to help you make that leap and gain the skills needed to protect us all from the cyber bad guys. Learn to be an Ethical Hacker or to gather digital forensics in ways so it's admissible in court. Learn how to lock down a network which allows the customers in and keeps all the data safe. There are literally hundreds of thousands of (well paid) career openings in companies like those listed above. Do you have what it takes? Ask your LearnKey Representative.

- Certified Ethical Hacker
- Certified Network Defender
- Certified Security Analyst
- CISSP
- Network Security Implementation

- Security +
- Penetration Testing
- Certified Application Security Engineer
- Certified Encryption Specialist

Please join me in congratulating all those who obtained certifications this month and send best wishes to those who are preparing to take an exam in the upcoming month.

Our team is here to help you succeed. Please don't hesitate to contact us.

Kind regards,
Jeff Coruccini
CEO, LearnKey, Inc.
